

# The GOLD Standard in Full Pour Athletic Surfacing

Beynon Sports has **eight (8) IAAF certified track and field surfaces** that meet diverse budgetary and performance requirements of the high school, NCAA and international track and field market. Beynon's IAAF certified track and field surfaces range from the more economical BSS 100 to the Olympic caliber BSS 2000 and SBR free, BSS 3000, track surface.

Beynon continues to surpass industry standards when it comes to providing athletic surfaces that last longer, perform better and have superior workmanship and physical properties than the competition.

While some companies are spending valuable time and money developing outdoor toys, scaled model cars, luxury yachts, and bouncy rubber balls, Beynon is solely focused on revolutionizing the athletic surfacing industry while perfecting the science behind competitive track and field surfaces.

Athletic tracks and gymnasium flooring is the **only** business Beynon is in, which makes Beynon the industry **specialist** in full pour athletic surfacing and the industry leader in IAAF certifications.

Company	Country	Number of IAAF Surfaces
